

Customer & Product System

Glass Creations Inc.

Proposal

- ◆ Desktop Application
- ◆ Database – (where the information is stored)
 - ◆ ~~Web Based~~
 - ◆ Hosted on local server (central office PC)

Requirements

- ◆ The application allows users to access it from any workstation within the organization (PC).
- ◆ The application allows Customer and Order information to be input using text fields.
- ◆ The application allows multiple production steps to be entered in the Order Form.
- ◆ The application stores Customer and Order information in a Database.
- ◆ The application requires employees to sign and date who completes each stage of delivering the order (Designed By, Spell Checked, Production, and Completed Order)
- ◆ The application allows stored Customer and Order information to be edited or archived.
- ◆ The application allows users to search for stored Customers and Orders*

Requirements

- ◆ Security - TBD
 - ◆ Desktop Application
 - ◆ Without internet connection
 - ◆ Database
 - ◆ Data stored locally
- ◆ Performance
 - ◆ Employees should not have any delays in completing tasks.
- ◆ UI
 - ◆ Aesthetically pleasing and simple.
 - ◆ Navigation should be consistent and easy to learn

Wireframes

A wireframe of a dialog box titled "Add Customer". The dialog box has a title bar with the text "Add Customer" and a close button (a small circle) on the right. The main area contains five input fields arranged in two columns: "Company Name" and "Telephone Number" in the top row, "Contact Person" and "Cell Number" in the middle row, and "Email Address" in the bottom left. At the bottom of the dialog box are two buttons: "Cancel" on the left and "OK" on the right.

Add Customer	
Company Name	Telephone Number
